

PERIOPERATIVE HYPERSENSITIVITY MASTERCLASS

 04 MAY 2024

 DUSIT THANI HOTEL, ABU DHABI, UAE

Perioperative hypersensitivity encompasses all hypersensitivity reactions that occur during anesthesia. Although uncommon, it's potentially life-threatening event.

This occurs during a particularly delicate time, marked by exceptional events. Identifying the signs and symptoms of an allergic or anaphylactic reaction in an unconscious patient undergoing surgery, after the rapid administration of multiple drugs, is especially challenging. Early recognition and treatment of perioperative hypersensitivity can significantly affect patient outcomes. However, this is just the first step in a much more complex management process. It requires effective communication between a nesthetists and allergists, a high level of knowledge and expertise and specialized resources.

In the Perioperative Hypersensitivity Masterclass, we will explore the latest advances in managing these reactions. We'll learn from experts in the field and discuss practical scenarios. Join our faculty of international speakers in the First Perioperative Hypersensitivity Masterclass.
